

Volunteer Role Profile

Volunteer Role

Volunteer Manager

Where you will be based

Work Experience (Wildlife)

Centre/Hospital Manager

Community

Why we want you

We are the RSPCA and it's our vision to live in a world where all animals are respected and treated with compassion. Our volunteers are incredible, they play an essential role in helping us carry out our important animal welfare work every day. To support your studies, the RSPCA offer work experience placements to students studying wildlife related subjects. In this role you'll get first hand experience of the RSPCA's vital wildlife welfare work, and the opportunity to practice some of the skills you have been learning.

What you will be doing

- Putting your animal care skills and knowledge into practice
- Following the instruction of your supervisor
- Working as part of a team

The skills you need

- Students who are studying towards and animal care qualification
- Good communication skills
- Ability to follow instruction and ask for clarification if unsure on what to do
- Ability to manage own time effectively.
- Ability to work well under pressure

What's in it for you

- Meet new people and make new friends
- Learn great new skills to add to your CV
- A great induction and training relevant to your role
- Volunteer in a fun environment at the heart of the local community
- A chance to develop your knowledge and skills
- You'll be making a huge difference to the welfare of wildlife

Disclaimer

Our voluntary roles are subject to an informal interview and introductory period. We will ask you to provide contact details for two referees. Before you can start volunteering you'll need to complete our simple online Health & Safety assessment. Tetanus is a life threatening bacterial disease caused by an infection in an open wound. In view of this everyone should be vaccinated to prevent infection and we require that all RSPCA staff and volunteers must be suitably protected. Tetanus vaccination is carried out in infancy (3 doses), at pre-school and in adolescence so everyone should have had 5 doses by the time adulthood is reached. This is considered to give lifelong protection although a booster might be considered if an injury is deemed to be high risk. We request that volunteers must check their vaccination history with their GP's and if fully immunised no further action is required. If a volunteer has not had the required doses, the GP should offer them free of charge as part of the UK vaccination schedule.
